SUMMARY

AI Engineer and full-stack developer who ships production systems end to end: LLM and RAG pipelines, real-time ML services, and the web and mobile apps around them. Recent work includes UOSBUDDY, a verified campus network for University of Sargodha students with a hybrid-search AI study assistant, and Salah Together, an offline-first React Native family app. I build security in from day one, with row-level security, tested database policies and CI checks, and I treat reliability as seriously as model accuracy. Open to full-time AI Engineering, ML Engineering and Software Engineering roles.

EDUCATION

Bachelor of Computer Science, University of Sargodha **(CGPA: 3.65 / 4.00)** 2022 - 2026

Coursework: OOPS, DSA, Computer Networks, Internet Architecture and Protocols, AI, DAA, DB Systems, OS, DIP, Compiler Construction.

SKILLS

Languages	Python (advanced), TypeScript, JavaScript, SQL, C++
ML / AI	LLM integration, RAG, conversational AI, TensorFlow, PyTorch, Scikit-learn
Backend and data	FastAPI, PostgreSQL, Supabase, Redis, MongoDB, MySQL, Pandas, GCP
Frontend and mobile	Next.js, React, React Native (Expo), Tailwind CSS, PWAs
DevOps and testing	Docker, Vercel, Google Cloud Run, GitHub Actions, Playwright, Vitest, Jest, pgTAP, k6
Soft Skills	Team leadership, Cross-functional communication, Technical documentation

EXPERIENCE

Jnr. AI Engineer - Full Stack Developer Jul 2024 - Nov 2024
Sofnix Pvt. Ltd *Islamabad, Pakistan*

- **Raised internal workflow throughput by 20%** with TensorFlow predictive models served through REST APIs to the production .NET Core backend.
- **Lifted session retention by15%** with an LLM conversational assistant (intent classification, context management), and cut response times on high-traffic endpoints by redesigning MySQL schemas.

Assoc. Data Scientist JUL 2025 - AUG 2025
Data Zenix *Karachi, Pakistan*

- **Built a Python pipeline** joining five economic indicators into a GCP dashboard, surfacing a GDP–debt correlation and a 40% poverty trend.
- **Shipped a car price model** (Decision Tree, MAE 1.0) and a sales regression (R^2 0.897) identifying TV spend as the main sales driver.

PROJECTS

UOSBUDDY: Verified Campus Network with AI Study Buddy · Full-Stack · AI · Next.js · TypeScript · Supabase · pgvector · Claude API · Redis (UOSBuddy) Built solo a mobile-first PWA where University of Sargodha students verify enrolment, find batchmates and connect through a feed, chats and help requests. Its AI study assistant pairs hybrid search (pgvector + full-text, reciprocal rank fusion) with Claude. Secured with row-level security and in-database rate limits; tested with pgTAP, Playwright and k6 (500 simulated students).

Salah Together: Offline-First Family Prayer Tracker · Mobile · React Native (Expo) · TypeScript · Supabase · Zustand · (Github Repo) Built a cross-platform app that computes prayer times offline (within one minute of AlAdhan), with logging, streaks and reminders. Family circles sync through an offline outbox to a live Supabase Realtime dashboard, secured with row-level security and tested with Jest in CI.

UOS Assistant - AI Inbound Calling Agent · Conversational AI · Python · FastAPI · OpenAI · pgvector · Google STT/TTS · Architected and led a four-person team delivering an end-to-end voice-driven calling agent that processes inbound calls through a Google STT → FastAPI → RAG pipeline (OpenAI embeddings + PostgreSQL/pgvector) → GPT-4o Mini → Google TTS, enabling natural Urdu-language intent classification and contextually aware response generation at production scale. (Github Repo)

Visual Document Search & QA (No-OCR Multimodal RAG)· Multimodal AI · ColQwen2 · Qdrant · FastAPI · Gemini · LangChain · Google Cloud Run Engineered a no-OCR document search system that embeds uploaded PDF pages directly as patch-level visual embeddings via ColQwen2 (ColPali family), stores and retrieves them using Qdrant's native MaxSim multi-vector search, and routes retrieved page images to Gemini 2.0 Flash for grounded answer generation eliminating OCR-induced retrieval failures on scanned documents, tables, and charts, with full observability via Langfuse. (Walkthrough)

Wavr - Real-Time Chat Application · Full-Stack · React · Node.js · Socket.io · MongoDB · Firebase · Deployed a production real-time messaging application on a MERN stack with Firebase Authentication for JWT-based user identity and Socket.io for sub-second message delivery, achieving zero-polling live presence tracking across concurrent users. (Repo)

EXTRACURRICULAR & LEADERSHIP

- **Department Representative,** University of Sargodha - Founded and led 7 student societies (Programming, Data Science, Event Management, Media, Sports, E-Gaming, Performing Arts, Blood Donation Welfare), managing cross-functional teams and large-scale events including a department dinner for 600+ students.
- **Best Student Award** - Awarded for academic excellence at college level
- **Member, GDG Pakistan.**

AWARDS AND CERTIFICATIONS

- **Google Data Analytics Professional Certificate** (8 courses, Coursera) Completed end-to-end data analysis curriculum covering SQL, R, Tableau, and stakeholder reporting. (Completion Badge) (LinkedIn)
- **IBM AI Engineer Professional Certificate** (8 courses, Coursera) Completed end-to-end AI engineering curriculum covering supervised/unsupervised learning, deep learning with Keras, PyTorch TensorFlow, LLM application development, RAG, generative AI agents, computer vision, and ML pipeline deployment on Apache Spark. (Certifications)
- **Deloitte Australia Data Analytics Simulation** (Forage, Feb 2026) Analysed forensic datasets, built a Tableau dashboard surfacing anomalous transaction patterns, and presented findings as a business memo. (Credential)
- **World Quant University Applied Data Science** Completed 8 end-to-end projects spanning time series, NLP, and classification modelling. (Completion Badge) (LinkedIn)
